

CONTENT

DANYLCHENKO D., GUICHUANG YUNG Research on system optimization and strategic path of China's energy security from the perspective of electrical engineering	3
ZINOVKIN V., TRETIKOV A. Study of phase reactances of special-purpose transformers during diagnostics of the excitation system of the electromagnetic scattering field	10
KHOMENKO I., ORLOV V., KARPUSHYN M., RIABININ S. Improving the accuracy of measurement of electrical values in the networks of regional energy companies	18
SHTOMPEL O. Study of quasi-stationary operating modes of a traction drive based on a synchronous-reactive motor with permanent magnets	23
BROVKO K., VYNOKUROVA N., VELYKOHORSKYI O. Computer simulation of the development of the Chernobyl nuclear power plant accident using an interactive simulator	31
DANYLCHENKO D., TSYUPA V. Method of implementing digitisation of relay protection and automation for power distribution facilities with a voltage of 6-10 kV	40
DOROSHENKO D. Prediction of carbon dioxide (CO ₂) emissions from gas turbines using machine learning techniques	47
DIACHENKO O., GAPON D., BAZHENOV V., RUDEVICH N., SHVETS S. Research on the impact of operating modes of the feeding network on the size of the dead zone in current protection	53
KOVAL O., KOVAL V., DEVOCHKIN V. Investment prospects in the development of renewable energy on the example of Germany	60
KOSTIUKOV I., KULYK O., LITVYNENKO S., KUBRYK B., LAVRINENKO O. Experimental justification of the scheme for replacing a three-core power cable with paper impregnated insulation for the case of resistive grounding of one of the cores	69
KOSTIUKOV I., FOSHCHII M., SYZOV Ye. Methods of formation of system of equations for determination of dielectric absorption parameters of insulation in three-core power cables by applying aggregate measurements	75
NOZDRENKOV V., DIAHOVCHENKO I., PETROVSKYI M. Optimal electric vehicle charging method considering impact on distribution networks, transformer lifespan, and power quality	81
NOZDRENKOV V., PAVLOV A., OLEKSIENKO G., ZHURAVLOV O., KORENEV M. Adaptive three-position control of ventilation in power facility premises with the risk of accumulating explosive gases	93
OMELIANENKO H., CHERKASHYNA V., MAKAROV A. The appropriateness of using electrical energy storage systems to increase the reliability of Ukrainian electrical networks	101
PASTUKHOV M., RIABOV Ye. Creation of power supply systems using expander-generator units	107
RUDEVICH N., GAPON D., LAZARIEV M., SHVETS S. Learning method in the operation of microprocessor systems of relay protection and automation	12
SAVCHENKO N., DOVGLYUK O., TRETIKOV A. Autonomous Microgrid system for domestic consumers based on energy-efficient technologies with renewable energy sources	121
SKRYPNYK R., HRYTSENKO V. Research on control algorithms for modern inverters in energy storage systems with virtual synchronous machine functions	127
