

## CONTENT

<b>OLIINYK Yu., BROVKO K., CHERNIUK A., VASIUCHENKO P.</b> Simulation of the integration of a solar power plant into a 10/0.4 kV distribution network using the SICAD platform .....	3
<b>ANDRUSHKO S., KULYK V.</b> Improvement of the rotor winding protection system for small- and medium-power synchronous generators against ground faults based on a square wave injection method .....	14
<b>BEZPROZVANNYKH H., SIATOVSKIY D.</b> Ensuring the performance characteristics of medium voltage power cables for active networks with distributed generation sources .....	23
<b>BURBELO M., MELNYCHUK S.</b> Voltage support and damping of low-frequency oscillations at large inverter-based generation facilities in 110 kV networks .....	32
<b>GAI O., GAI H.</b> Methodological approach to time-integrated assessment of auxiliary energy consumption in power transformer cooling considering regulatory requirements .....	40
<b>DANYLCHENKO D., SHEVCHENKO S., DIVCHUK T., SKRUPSKA L.</b> Simulation of electromagnetic processes in the power supply of induction motors from underground substations .....	48
<b>DMYTRENKO O.</b> Centralized and decentralized relay protection systems .....	53
<b>IEGOROV O., KUNDENKO M., IEGOROVA O., YUMING Dong</b> Improvement of dynamic characteristics of a synchronous reactive electric motor with an external rotor through design improvement .....	58
<b>KATSADZE T., SHCHERBYNA D.</b> Balancing electric power grid modes using gravitational energy storage systems .....	66
<b>KOSHMAN V., SABARNO L., SEVASTYUK I.</b> Development of principles for detection of wire brokenness in a three-phase distribution network .....	71
<b>KURLIAK P., BATSALA Ya., FEDORIV M.</b> Modeling the influence of nonsinusoidal supply voltage on the operating modes of an induction electric drive .....	76
<b>LEBED D., VOITIUK Yu., SHULLIE I.</b> Research on the influence of LC-filter on UPQC-VAmIn operation when changing the power source voltage .....	83
<b>NESTERENKO O., KUNCHENKO T.</b> Structure of a virtual-physical testing system for a dual-channel individual controlled electric drive of an electric vehicle .....	90
<b>OMELIANENKO H., HURINCHUK V.</b> Research on the use of digital twins in the energy sector .....	96
<b>POPENKO K., ZAGAYNOVA A.</b> Methods for improving the energy efficiency of networks with high penetration of renewable energy sources and their impact on the static stability of the system .....	102
<b>RUDEVICH N., GAPON D., LAZARIEV M., SHVETS S.</b> Methodology for developing research competence in digital relay protection and automation systems .....	110
<b>SEMENOV A., ARENDARENKO V., KHARAK R., VOVK V.</b> Current state of integration of vacuum circuit breakers and control systems in medium- and high-voltage electrical networks .....	118
<b>SOPEL M., DENYSIUK S., SPODYNYSKYI O., MYKHAILEVSKIY O.</b> Features of design and implementation of advanced adaptive emergency control systems for power systems .....	125
<b>TUGAI Yu., SHEVCHUK V., KUCHANYSKYI V.</b> Inertia problems of electric power systems with inverter generation sources .....	134
<b>KHARCHENKO V.</b> Digital loop model for improving photovoltaic energy yield .....	141
<b>CHERKASHYNA V., OMELIANENKO H., PONOMARENKO S., MAKAROV A.</b> Research on energy efficiency issues of the electric power transmission system .....	151
